BRINOMETERS For use in catering applications

Brannan offers a range of hydrometers, suitable for a variety of applications.

Our brinometer measures the percentage of saturated solution of brine in water at 15.6°C (60°F) and can be used for brining fish, to assist in the production of cheese and other foodstuffs.

Brannan brinometer product features:

- Part of Brannan special purpose hydrometer range
- Measures salt concentration in brine
- Assists in the production of cheese and other foodstuff
- Can be supplied with either UKAS or traceable calibration certificates
- 230mm length hydrometer
- Range: 0 to 100% brine
- Made in UK
- Supplied in protective, resealable plastic tube

Product reference: 10/621/0
